Beyond Safety

Sicherheitsflamme ✔

Durch die neue **Fix Flame Technologie** wird die Flammenhöhe im Produktionsprozess fest eingestellt. Eine hohe Flammenbildung während der Nutzung wird dadurch verhindert und die Sicherheit erhöht.

Safety Flame ✔

Due to the new **Fix Flame technology**, the flame height is automatically adjusted in the production process. This prevents the lighter to produce a high flame during use and increases safety to the consumer.

Hitzebeständig ✔

Durch den im **NY-2** verwendeten High-tech-Kunststoff **Polyoximethylen [POM]** und die moderne Konstruktion wird die im internationalen Sicherheitsstandard **ISO 9994** geforderte Temperaturbeständigkeit von 65 °C bei Weitem übertroffen.

Das **NY-2 Fix Flame** Feuerzeug ist geeignet für Temperaturen bis zu **75 °C**.

Heat resistance ✔

Due to the high-tech **Polyoximethylen [POM]** material and the advanced design, the new **NY-2** surpasses the requirements of the international safety standard **ISO 9994** in regards to the required 65 °C temperature resistance.

The **NY-2** can withstand temperatures up to **75 °C**.

Gasinhalt ✔

Durch den aus **POM** gefertigten Tank, erhöht sich aufgrund der dünnen Wände der Gasinhalt.

Gas capacity ✔

The **POM** gas tank allows a higher gas capacity because the material is thinner compared with a regular lighter.

Stoßfest ✔

Durch den aus **POM** gefertigten **stoßfesten Boden [Shock-Proof-Bottom]** wird die Sicherheit beim Herunterfallen des Feuerzeuges erhöht.

Impact resistance ✔

The **Shock-Proof Bottom** protects the lighter body when dropping by absorbing shocks on the suspension bottom plate, made of **POM**.
